PROJECTS

Autonomous Robotic Lung Ultrasonography

Research project participated at CUHK, 2023–24, supervised by Prof. LI Zheng. Project aim: use robots to perform autonomous point-of-care lung ultrasonography in intensive care units to prevent clinicians from infection during pandemic. My contribution: served as robot development lead, prototyped an robotic lung ultrasonography system and assisted in its preclinical validation.

Manipulator-Assisted Drone Landing on Dirsturbed Aquatic Platform

Research project participated at CUHK-Shenzhen, 2021–23, supervised by Prof. QIAN Huihuan. Project aim: use a manipulators to assist the landing of drones on aquatic platforms in windy and choppy conditions. My contribution: assisted Ph.D. students in the development and validation of manipulators' end-effectors and motion planning algorithms for the drone landing assistance task.
